

TABULÆ FOENERATORIÆ,
OR
T A B L E S
FOR THE
Forbearance and Discompt of
M O N E Y.

LIKEWISE
T A B L E S for the Forbearance, Discompt, and Purchase of Annuities to 31 years at the rate of 6 *l.* per Cent. per Annum, according to the late Act of PARLIAMENT.

CALCULATED
By *R O G E R C L A V E L L*, Gent.
Student in the Mathematicks.

AND
A Table for the summing up of Commodities, composed by Mr. *Webster*, but altered into another form by the Author abovesaid.
All performed by Addition only.

The second Impression.

Whereunto is Annexed
An Appendix shewing the construction of the Tables for the Forbearance and Discompt of Money, and also how the like Tables may be made at any other rate of Simple Interest.

By *T. R.*

L O N D O N ,
Printed by *John Macock*, for *John Spicer*, at the Receipt of his Majesties Exchequer at *Westminster*, 1669.

TO THE
READER.

AS Numbers are in themselves infinite, so the variety of their operations is no less, no subject wherein Numbers hath the rule but may be altered ad libitum; and in their mutation every one pleaseth his own fancy. The form of the Composition of these Tables for the Forbearance and Discompt of Money, and Forbearance, Discompt and Purchase of Annuities did best suit with mine; which I here present unto thee, as being obvious to the meanest capacity, and such as the resolutions of questions belonging to them are both easie and quick. I will not trouble thee with a large preamble, nor am I affected (as some are) with putting a curious title on the outside to render them plausible to thy first perception, or put a gloss upon them, that they may be the more vendible; as it is, so it comes forth in a plain garb, nor hath it more in the title then the Book is able to demonstrate; thy practice in the use of these Tables shall (I dare presume) speak so much; I leave the Commendations of them to thee as thou findest them answer thy expectation. I have not

To the Reader.

here composed any other Tables of Forbearance of money then for days to a year, or for any other then months for Discompt of money, since that dayes for the former is most exact (the numbers for months and quarters I leave them out, being so easie that every one can tell the interest of any sum for those times) and months for the latter is most concordant to the Merchants trade; Nor do I follow the rule of M. Butler, and other Artists, who make use of mean proportionals, so that the interest, taken before the year be out, arise not to a greater quantity then is due at the years end; though I allow of the truth of their Tables, yet custome shall plead a priviledge for mine, which is the Ground upon which I framed them, onely in Tables of Annuities I agree with them in the proportion: and so I leave thee to the perusal of them.

R. C.

The

The use of the foregoing
T A B L E.

BY the Table preceding you may find out the exact Number of days from one time prefixt to another, under a year thus ;

Question.

I would know the exact number of days from the 16 of *February* to the 14 of *August*.

Answer.

In the highest Column find the Column descending from *February*, in which let your eye descend to *August* : which done take the number next above it, to which adde the 14 days of *August*, and from that aggregate substra& the 16 days of *February*, and the remainder is the number of days desired.

Example.

The number next above <i>August</i>	181
The days of <i>August</i>	<u>014</u>
Aggregate	195
The days of <i>February</i> subtr.	<u>16</u>
The number of days desired	179

Instructions

Instructions for use of Tables following.

TH E Column next under the Title hath the number of days for Interest and months for Discompt; the Column next beneath it hath *l. s. d* 1. 000 the decimal denominator to the decimal fractions in the Column just under it descending.

The first Column to the left hand have the Principal set down in it from 10000 *l.* to 1 *s.* with Principal pounds just over it: the next four Columns hath the *l. s. d.* and the foresaid fractions (being the interest answering to it in the first Column;) each day for Interest, or each month for Discompt containing so many Columns; this I suppose sufficient for the understanding the form and position of my Tables.

In the next place I intend to demonstrate the use of my Tables in the resolutions of Questions; but first take notice, for your better understanding of the nature of the Fractions: when you have 2, 3, 4, or 5, or more of them to be added together; add them together as a whole number, and as many tens as you carry from the last place next your left hand, add them to the pence, as so many pence, and for the fraction that remains you may know the value of it by these three numbers:

$$\begin{array}{r} 750 \\ 500 \\ 250 \end{array} \left. \vphantom{\begin{array}{r} 750 \\ 500 \\ 250 \end{array}} \right\} \text{signifies} \left\{ \begin{array}{l} \frac{3}{4} \text{ three farthings.} \\ \frac{1}{2} \text{ two farthings.} \\ \frac{1}{4} \text{ one farthing.} \end{array} \right.$$

You may by your eye, without making use of your pen, perceive whether the remaining Fraction be over or under any of these 3 numbers, and judge the value accordingly; you may by my resolution of questions understand it better.

1 Question of Forbearance of Money.

I would know the Interest of 3746 *l.* 19 *s.* for 179 days, or from the 16 of February to the 14 of August.

a

Ans.

Ans. Find the time in the Column at the top next the title, and set down your principal after this manner, and find each sum's respective interest just against it, under 179 days, and set each sum of interest equal with his principal in one line and add the sums together, whose aggregate is the interest of the whole principal; so that I find the interest of 3746 l. 19 s. for 179 days to be 10 l. 5 s. 0 $\frac{1}{2}$.

princ.		interest.			
l.		l.	s.	d.	
3000		88	5	5	753
700		20	11	11	342
40		1	3	6	476
6		0	3	6	372
10		0	0	3	531
9		0	0	3	177
3746	19	110	5	0	651

2 Question of Discount of Money.

If 3496 l. be due to be paid at the end of 25 months, what sum of money will pay it presently, discounting interest at the rate of 6 l. per Cent. per Annum.

Ans. Set down the principal as before, and each number's respective sum discounted equal to it for 25 months, add the respective sums together, and their aggregate is the sum desired. By which I find that 3107 l. 11 s. 1 d. 333. or one third of a penny will pay 3496 l. if it be paid 25 months before 'tis due.

l.	l.	s.	d.	
3000	2666	13	4	000
400	0355	11	1	333
90	0080	00	0	000
6	0005	06	8	000
3496	3107	11	1	333

3 Question of Discount of Money.

A. buys of B. certain Commodities, for which B. must have 5526 l. 12 s. to be paid at three six months; A. willing to satisfy B. presently desires to know what sum he must pay.

Ans. Because B. is to be satisfied at three payments, take one third of the principal and find it discounted according to the last example: So likewise $\frac{1}{3}$ discounted for 12 months, lastly $\frac{1}{3}$ discounted for 18 months, the aggregate of these three sums discounted answers the question.

Ex.

Ex. the $\frac{1}{2}$ of 5526 l. 12 s. is 1842 l. 4 s.

l. s. d.					l. s. d.						
6 Months.	1000	970	17	5	708	12 Months.	1000	943	7	11	094
	800	776	13	11	766		800	754	14	4	075
	40	38	16	8	388		40	37	14	8	603
	2	1	18	10	019		2	1	17	8	830
	4	1	3	10	602		4	1	3	9	283
1788 10 10 403					1737 18 5 885						

	l.	s.	d.	
	1000	917	8	7 486
	800	733	18	10 788
18 Months.	40	36	13	11 339
	2	1	16	8 356
	4	0	3	8 036
18 Mon.	1690	1	10	015
12 Mon.	1737	18	5	885
6 Mon.	1788	10	10	483
Aggregate	5216	10	2	383

By which operation I find that 5216. 10. 2. 383 or $\frac{1}{4}$ of a penny will pay 5526 l. 12 s. if it be paid 25 months before it becomes due.

Questions concerning the Forbearance of Annuities.

If 194 l. Annuity, Rent or Pension (for there is no difference between them in the work) be forborn 19 years, what will it amount unto at the end thereof, reckoning interest at the rate of 6 l. per Cent. per Annum.

Ans. Seek out the time, which here is 19 years, and set down the sums answering to the Annuity as you did in the operation of the questions of Forbearance and

	l.	l.	s.	d.	
Discompt of Money, thus:	100	3375	19	11	800
So that 194 Annuity forborn	90	3038	7	11	820
19 years, will amount to the	4	135	0	9	592
sum of		6549	8	9	212

After the same manner you may resolve any Question of debts where there are yearly payments, and all respited till the last year.

And so likewise you may do where an Annuity is offered to pay a debt, to see whether the Annuity will countervail the debt or no.

1 Question of Discompt of Annuities.

What is 194. l. Annuity, Rent or Pension to endure 19 years, worth in ready money at 6 l. per Cent. per Annum.

Ans. Look in the Table for discompt of Annuities, and find the time as aforesaid, and set down

the sums answering the Annuity, thus :

	l.	l.	s.	d.
100	1115	16	2	796
90	1004	4	7	316
4	44	12	7	791
	<u>2164</u>	<u>13</u>	<u>5</u>	<u>903</u>

By which you see that 194 l. Annuity will be bought with the sum of

Question 2.

There is a lease of certain lands worth 325 l. per An. more then the rent paid to the Landlord for it; of which land there is a lease in being of 8 years, and the Lessee willing to take a lease in reversion for 23 years to begin when the old lease is expired; what sum of money must he pay for this lease in reversion, at the rate of 6 l. per Cent. per Annum?

Ans. First find out what 325 l. per Annum is worth for 8 years, by setting down the sums answering to the Annuity for that time, thus:

	l.	l.	s.	d.
300	1862	18	9	158
20	124	3	11	010
5	31	0	11	752
	<u>2018</u>	<u>3</u>	<u>7</u>	<u>920</u>

Then add 8 years to 23 years and it makes 31 years: find out what 325 l. Annuity is worth for 31 years, thus:

Subtract the former sum from the latter and the remainder answers the Question.

	l.	l.	s.	d.
300	4178	14	0	192
20	278	11	7	612
5	69	12	10	903
	<u>4526</u>	<u>18</u>	<u>6</u>	<u>707</u>
	<u>2018</u>	<u>3</u>	<u>7</u>	<u>920</u>
	<u>2508</u>	<u>14</u>	<u>10</u>	<u>787</u>

Remainder —

Questi-

Question 3.

There is a lease of certain lands to be lett for 12 years, for which there is a fine of 200 *l.* to be paid, and 300 *l.* per Annum Rent; but the Tenant being willing to pay less Rent, to wit 15 *l.* per Annum and to give a greater Fine; what Fine ought to be paid to bring the Rent to 15 *l.* per Annum, at the rate aforesaid.

Ans^r. Find the abatement of Rent, as here 15 *l.* see what 15 *l.* per Annum is worth ready money for 12 years, which being found and added to the former fine, gives you the resolution of the question, thus:

	<i>l.</i>	<i>l.</i>	<i>s.</i>	<i>d.</i>
So that you see the Fine is augmented from 200 <i>l.</i> to 325 <i>l.</i>	10	83	16	9 226
15 <i>s.</i> 1 <i>d.</i> to bring the Rent from 30 <i>l.</i> per Annum, to 15 <i>l.</i> per Annum.	5	41	18	4 612
		125	15	1 839
		200	0	0 000
		325	15	1 839

Question 4.

A. hath a Lease of 32 *l.* 10 *s.* for 15 years, B. hath a Lease of 20 *l.* 5 *s.* for 21 years; These two being desirous to change their Leases and give the difference of the price; The question is, which Lease is the better, and what the one ought to give the other for the change, accompting interest at the rate aforesaid? The work

A.					B				
<i>l.</i>	<i>l.</i>	<i>s.</i>	<i>d.</i>		<i>l.</i>	<i>l.</i>	<i>s.</i>	<i>d.</i>

	315	12	11	552					

	<i>l.</i>	<i>s.</i>	<i>d.</i>
The Lease A is worth	315	12	11 557
The Lease B is worth	238	4	5 411
The difference is	77	8	6 146

which B, is to pay to A. upon the exchange of the two Leases:

1 Question concerning Purchase of Annuities.

One hath a sum of money, viz, 300 *l.* and is desirous to know what Annuity that will buy him for 21 years at the rate aforesaid.

Note, That though the questions alter, yet the manner of the taking out of the numbers out of the Tables all along is one and the same.

Ans. Look into the Tables for Purchase of Annuities and find out the time, and in the first Column to the right hand find the ready money, 300 *l.* and the sum answering to it, which is here 25 *l.* 10 *s.* 0 *d.* $\frac{1}{4}$ the answer of the question the Annuity that 300 *l.* will buy for 21 years.

2 Question.

If the Lease of a house or lands be worth 153 *l.* fine, and 16 *l.* rent *per Annum* for 12 years, and the Lessee be desirous to bring down the fine to 80 *l.* and so to pay the more rent, the question is what rent the Tenant shall pay, accompting interest at the rate aforesaid.

Ans. Take the difference between the two fines, by subtracting one from another; here the remainder of difference is 73 *l.* find out what Annuity this 73 *l.* will buy for 12 years; which added to the rent in the question, will be 24 *l.* 14 *s.* 1 *d.* 732. and so much rent is to be paid if the Tenant bring the fine down to 80 *l.*

	<i>l.</i>	<i>l.</i>	<i>s.</i>	<i>d.</i>	
find out what Annuity this 73 <i>l.</i> will buy for 12 years;	70	8	6	11	853
which added to the rent in the question, will be 24 <i>l.</i>	3	0	7	1	879
14 <i>s.</i> 1 <i>d.</i> 732. and so much rent is to be paid if the Tenant bring the fine down to 80 <i>l.</i>		8	14	1	732
		16	0	0	000
	24	14	1		732

3 Question.

There is a certain Lease of an house for 21 years, for which the Lessee paid 120 *l.* fine and 24 *l.* rent *per Annum*, which after 12 years by reason of some inconveniences, he is desirous to put it off. The question is, what rent he shall lett it taking no fine at all, or what fine he shall rake and let it go at the same rent he pays, to make a saving bargain, at the rate of 6 *l.* per Cent. *per Annum*.

Ans.

Ans. Find what yearly rent 120 l. will purchase for 21 years, which added to the rent in the question, the aggregate is the rent, he ought to let the house at; Now for the fine he is to take, if he let it at the same rent, consider there is 12 years expired, therefore there is to come but 9 years; therefore seek the present worth of the Annuity that 120 l. will buy for 21 years, (which is 10 l. 4 s. 0 d.) which is resolved by the Tables of Discompt of Annuities, where find the time yet unexpired of the Lease, which is 9 years, the answer will be 69 l. 7 s. 6 d. $\frac{1}{2}$ so that if this house be lett at 34 l. 4 s. per Annum, or take 69 l. 7 s. 6 d. $\frac{1}{2}$ fine for the remainder of the Lease, he shall either way make a saving bargain.

	l.	l.	s.	d.	
100	8	10	0	109	
20	1	14	0	021	
	10	4	0	130	
	24	0	0	000	
Recd.	24	4	0	130	

	l.	l.	s.	d.	
10	68	0	4	062	
4 s.	1	7	2	481	
Fine	69	7	6	543	

Question 4.

A. Took a Lease for 21 years of *B.* for which he paid 225 l. fine, and 20 l. rent per Annum, but at the end of 11 years, *A.* through many losses grown behind hand, and his rent unpaid for 2 years, he agrees with *B.* to exchange his lease for another of less rent, namely, 15 l. per Annum, for the residue of his lease which is yet in being 10 years, that so he may pay the old debt. The question is, what money is due between them, and to vvhich of them accounting interest at the rate aforesaid.

Ans. First seek vvhath Annuity 225 l. vvhill purchase for 21 years, vvhich is 19 l. 2 s. 6 d. and almost $\frac{1}{4}$. Then see vvhath this 19 l. 2 s. 6 d. is vvvorth for 10 years the remainder of the Lease, vvhich appears to be 140 l. 15 s. 2 d. $\frac{3}{4}$ this reserve for *A.* his part.

	l.	l.	s.	d.	
200	17	0	0	218	
20	1	14	0	021	
5	0	8	6	005	
	19	2	6	244	

	l.	l.	s.	d.	
10	73	12	0	209	
9	66	04	9	788	
2 s.	0	14	8	642	
6 d.	0	3	8	160	
	140	15	2	799	

Then

Then for B. seek the vworth of 15 l. per Annum for 10 years : which is found to be worth 110 l. 8 s. 6 d. Then seek what 20 l. per Annum, being forbore 2 years will amount unto, which appears to be 41 l. 4 s. which add to the 110 l. 8 s. 0 d. 313. from vvhich aggregate take the part of A. that is 140 l. 51 s. 2 d. 799. there vwill remain due to B. 10 l. 16 s. 9. d. 514.

Directions for this last Table.

If one ell of Canvas cost 7 d. what shall 9876 ells cost?

To answer this question and the like, you must look for 7, the number of pence which one ell cost, amongst those figures which stand at the head or top of this Table, for those figures here, do not represent the time, as in the former Tables, but the price of one yard, ell &c. so looking under the said figure 7, as if you would look for the interest that 9876 l. yields in 7 days: you shall find for 9000 262 l. 10 s. 0 d. and for 800 you shall find 23 l. 6 s. 8 d. for 70 you shall find 2 l. 0 s. 10 d. and for 6 you shall find 3 s. 6 d. all which put together do make 288 l. 1 s. 0 d. and that is the just sum that 9876 ells of Canvas comes to at 7 d. per ell. If your price be 8, 9, or 10 d. an ell, or less or more, you must look under those numbers as now you did under 7. If your price be 16 d. or 2 s. 5 d. &c. the ell, then take out the shillings from your price, which is easie to cast up; and then bring your pence to this table as aforesaid: or you may look under the number 12, and find the sum arising at 12 d. an ell, which doubled, will be the sum arising at 2 s. an ell, &c. If your price be one farthing, or three farthings a yard, then you must look in the 2 columns of this page, where one of the columns shews the sum arising at 1 farthing the yard; the other column shews the sum arising at 3 farthings the yard. So shall you quickly find

that 9876 yards, at 1 q. the yard, do come to 10 l. 5 s. 9 d. and the same number of yards at 3 q. the yard come to 30 l. 17 s. 3 d. &c.

Now if you would reduce farthings into pounds, then you must take the great numbers next the left hand for farthings, and the sum which they amount unto you shall find in the Column next the right hand, so shall you see that 10000 farthings do make 10 l. 8 s. 4 d. 9000 farthings do make 9, 7, 6, &c.

If you would reduce pence into pounds, then you must take the said great numbers,

Directions for this last Table.

numbers next the left hand for pence, and the sum which they amount unto, you shall find in the next Column under the figure 1. so shall you presently see that 9000 d. do make 37 L. 10 s. 0 d. And if you would know how much 90000 d. amount unto, then look into the Column answering to 9000 under the number 10. where you shall find 375 L. and so much do 90000 d. make, and so the rest.

Now for the reducing of pounds into pence and farthings, that is comprehended in the very first leaf of this Table, where you see the two last Columns towards the right hand do shew how many pence and farthings are contained in 1, 2, 3, 4, 5, 6, 7, 8, and 9 l. now to know by this how many are contained in any other number of pounds, is thus: how many pence and how many farthings are

in	l.	d.	q.
	9876	2160000	8640000
		192000	768000
		16800	67200
		1440	5760
		<u>2370240</u>	<u>9480960</u>

Answer 2370240 pence, and 9480960 farthings, which by the only addition of Cyphers to the numbers set down in this Table presently appears: the reducing of gross weight into subtle pounds is expressed in the first side likewise of this Table, and is performed after the manner aforesaid.

Now if you take this for a Table for Simple Interest direct at 5 per Cent. then you must take the numbers at the head or top of the Table for months, and the numbers in the first Column towards the left hand you must take for the sums of money, whereof you would know the interest, just as in the former Tables for interest: for example, I would know the interest of 368 l. for 7 months, at 5 per Cent. I find under the figure 7 against 300. 8 l. 15 s. 0 d. against 60 I find 1 l. 15 s. 0 d. and against 8 I find 4 s. 8 d. all which put together make 10 l. 14 s. 08 d. the just interest of 368 l. for 7 months at 5 per Centum.

TO THE READER.

THE Computation of Interest is commonly made either by months or days; the former by months, I like not, because our months neither do nor can consist of an equal number of days. The Computation therefore by months must be erroneous, and therefore dangerous, the Law having made it very penal to such, who shall take above the rate which is tolerated; I prefer therefore the latter way of Computing Interest by days, being most safe and exact. This was well known to the Author of these excellent Tables, which for exactness and plainness cannot be paralleled, being so exact, that they are calculated to the thousandth part of a Penny, and so plain and easie for use, that they who have made no further progress in the admirable Art of numbers then Addition only, may resolve all questions for the forbearance and discompt of Money, and the forbearance, discompt and purchase of Annuities at the rate of 6. per Cent. Notwithstanding some do object, saying, how shall we know these Tables are truly calculated, and if so, yet it is more

To the Reader.

then possible, the faults of the Press may not be few. For the vindication therefore of the Author, in the satisfaction of such who will take the pains to examine them, I have (at the request of Mr. John Spicer, who hath been at the charge and trouble of the Printing, and the careful Examination of this Second Impression) here shewed the construction of all the Tables, as well for the forbearance and discount of Money, as also for the forbearance, discount and purchase of Annuities at the rate of 6. per Cent. and how the like Tables may be made at any other rate of Interest whatsoever.

Novissima Die Maii, Anno
à partu Virginis,
1669.

Thomas Ruffel.

The

The ground of the Rule for the Computation of Simple Interest by days at any Rate assigned, is from the Golden Rule compos'd of five numbers, which will be manifest by an Example.

Example.

LET it be required to find the Interest of 500 *l.* for 200 days, at the Rate of 6 *per Cent.* Simple Interest.
If 100 *l.* in 365 days, gain 6 *l.* what shall 500 *l.* gain in 200 days?

$6 \times 500 \times 200 = 600000$. So is 600000 the Dividend.

$100 \times 365 = 36500$. So is 36500 the Divisor.

From hence ariseth this General Rule for the computing the Simple Interest of any sum of Money, for any number of days at any Rate assigned.

Rule.

1. Multiply the principal by the Rate of Interest, and Multiply that product by the number of days, the last product is the Dividend. So in this example, 6. Multiplied by 500. the product is 3000. which Multiplied by 200. the last product is 600000. for the Dividend.

2. Multiply 100 by 365. the product is 36500. the divisor, so is 36500 a common divisor for all Rates of Interest whatsoever.

Note here, that it is necessary to make the Decimal Fraction to consist of 6 places, which is done by annexing 6 Circles, or Ciphers to the Dividend. But because in the Divisor the two last places are Ciphers (*viz.* in 36500) therefore the annexing 4 Ciphers may be sufficient to make the Decimal Fraction to consist of 6 places; so if to the Dividend 600000. you annex 4 Ciphers, and cut off 6 places to the right hand by a point or separating line; the Dividend will stand thus.) 6000 | 000000 (. and so will 365 be a common Divisor for all Rates of Interest; and if you multiply this

B b 2

common

$$\begin{array}{r}
 1 \quad | .365 \\
 2 \quad | 730 \\
 3 \quad | 1095 \\
 4 \quad | 1460 \\
 5 \quad | 1825 \\
 6 \quad | 2190 \\
 7 \quad | 2555 \\
 8 \quad | 2920 \\
 9 \quad | 3285 \\
 \hline
 365 \cdot (1 \cdot \\
 \hline

 60
 \end{array}$$

1. **M**ultiply the Decimal Fraction (.438356) by 20. and cut off so many places to the right hand, as the Fraction hath places, which in this example are 6. or rather multiply the said Fraction by 2. and cut off one place less; the figure or figures cut off to the left hand are the number of shillings. So .438356.

being multiplied by 2

$$\overline{8.5 \mid 76712.}$$

2. Multiply the figures cut off to the right hand (*viz.* 76712) by 12, and from the product cut off 5 places to the right hand, the remaining figure or figures to the left, is the number of pence.

So .76712.

Multiplied by 12

9 d | 20544.

Thus is the value of the said Decimal Fraction ($\frac{438356}{1000000}$) found to be 8 s. 9. and the figures cut off to the right hand, viz. (20544) are the Decimal Fraction of one penny, whereof the 3 first figures, viz. 205. agree with the Authors Table. So if you seek the Interest of 500 l. for 200 days in the Authors Tables, you will find it to be 16 l. 8 s. 9 d. 205.

By

By this Rule the Table of interest may be made; first calculating the interest of 10000 *l.* for one day, working out the Decimal Fraction to 15 or 16 places, the 10th part of the interest of 10000 *l.* is the interest of 1000 *l.* which being subtracted from the interest of 10000 *l.* the remainder is the interest of 9000 *l.* so by Subtraction may all the lesser sums be found for one day, which several interests for one day being severally doubled, will be the interest for 2 days, and the interest of 1 day, being added to the interests of 2 days; makes the interest of 3 days, and so by Addition may the Table be made up to 365 days, without the trouble of calculating the interest of every particular sum for every particular day; and thus may Tables be made at any other Rate of interest whatsoever.

Here I think it not unnecessary to insert the Decimal Table for Money, the construction whereof is from the Rule of reducing Vulgar Fractions into Decimal Fractions, *viz.*

As the Denominator of the Vulgar Fraction.

To the Nominator thereof:

So an Unite with Ciphers

1. To the Numerator of the Decimal Fraction, whose Denominator is an Unite with as many Ciphers as the Numerator hath places.

From hence ariseth this general Rule. Unto the Numerator of the Vulgar Fraction, annex a competent number of Ciphers, and divide it by the Denominator; the quotient is the Numerator of the Decimal Fraction, whose Denominator is an Unite with as many Ciphers as the Numerator hath places.

Example.

What is the Decimal of 19 *s.* which is $\frac{19}{20}$ of 1 *l.* unto 19. annex 20 Ciphers, and divide it by 20. thus, 2) 190 | 0 (95. so is $\frac{95}{100}$ the Decimal of 19 *s.* and so the Decimal of 18 *s.* is found to be $\frac{90}{100}$. but the Denominators of the Decimals are never exprest, being of no use. After this manner the Decimal Table for whole shillings is made, where observe the Decimal of 1 *s.* is .05. To continue this Table to pence and farthings, consider that in 1 *s.* are 48 farthings, wherefore

As .48.

To .05.

So any other number of Farthings.

To the Decimal thereof.

From

From hence comes this Rule. Unto .05. annex a competent number of Ciphers, then multiply it by the number of Farthings (which you will put into a Decimal) and divide that product by 48. the quotient is the Decimal required. So if 11 *d.* $\frac{3}{4}$ be required to be put into a Decimal, consider that in it are---47 Farthings; wherefore multiply .05. by 47, the product is .235 unto which annex 4 Ciphers, and divide it by 48. the quotient will be .48958. before which prefix one Cipher; So is .c48958. the decimal for 11 *d.* $\frac{3}{4}$. And why a Cipher is here prefixt before the significant figures, is well known to those who understand the doctrine of Decimals, unto which I refer the Reader. And thus is all the rest of the Table made downwards to one Farthing.

The use of the Decimal Table following will be manifest by an example, what is the interest of 55 *l.* 8 *s.* 6 *d.* for 300 days at 6 per Cent. The 8 *s.* 6 *d.* being put into a Decimal Fraction by this Table will be .425. So 55 *l.* 8 *s.* 6 *d.* will be 55.425. which (according to the rule before shewed) being multiplied by 300. the product is 99765000. which being divided by 365. as is before shewed . . 365)9971650000. (one Cipher being annexed to make the Decimal 6 places, the quotient is found to be 2 *l.* 733287. and the decimal .733287. is found by this Table, 14 *s.* 7 *d.* $\frac{3}{4}$.

There is yet another way of computing Simple Interest by days, by the help of a little Table consisting of 10 several numbers, answering to 10 several Rates of interest, viz. 3. 4. 5. 6. 7. 8. 9. 10. 11. 12. per Cent. The Construction of which is from the fore-mentioned Golden Rule composed of 5 numbers, so if it be required to make the number for 3 per Cent. If 100 l. in 365 days, gain 3 l. what shall 1 l. in 1 day. From hence comes this general Rule.

As 365. to 3. (the rate proposed) so an unite with Ciphers to the num-

ber required.

So if unto 3 (the rate proposed you annex 8) or more Circles or Ciphers, and divide it by 365. the quotient will be 8219178. before which 4 Ciphers are to be prefix'd; and why 4 Ciphers are here

to be prefix'd, is well known to those who understand the doctrine of Decimals, to which I refer the Reader. So is.00008219178.the number for 3 per Cent. So if unto 4 you

you add Ciphers, and divide it by 365. the quotient will be 10958904. before which prefix 3 Ciphers; so is 00010958904. the number for 4 per Cent. and so are the rest of the numbers made.

The use of this Table is this, viz.

Multiply the principal given by the number answering to the Rate of Interest in this Table, and Multiply that Product by the number of days, and from that Product cut off 11 places to the right hand: The figure or figures cut off to the left hand, are the number of pounds, and the Decimal Fraction to the right hand, may either be reduc'd as is formerly shewed, or the value thereof found by the Decimal Table for Money. So if it be required to find the interest of 200 l. for 300 days, at the rate of 6 per Cent. simple interest; the number in the Table for 6 per Cent. in this little Table is .00016438356. which Multiplied by 200. is .000328761200. which Multiplied by 300. the number of days, the last product is .000986301360000. from which cut off 11 places to the right hand thus 0009 l. 8630136. so is the interest of 200 l. for 300 days 9 l. and the value of the Decimal Fraction (*viz.* 8630136) by the Decimal Table for Money is found to be 17 s. 3 d. or being reduc'd, as is formerly shewed, is 17 s. 3 d. 123. so is the interest of 200 l. for 300 days, 9 l. 17 s. 3 d. 123. which agrees precisely with Mr. Clavels Tables.

Of Rebate or Discompt of Money Simple Interest.

REbate or Discompt of Money at Simple Interest at a Rate assigned, is grounded upon this reason, that he who receives his Money upon rebate, ought to receive just so much ready Money, which being put out at interest at the same Rate, and for the same time, will amount to the same sum. So if 106 l. be due at the end of one year, the Creditor ought to receive 100 l. just, because 100 l. being put out at the same Rate of interest, and for the same time, will amount to 106 l. just. From hence ariseth this general Rule.

As

As the sum of the Principal and Interest
To the Principal :
So any other sum given for the same time
To the ready Money required.

So if 400 l. be due at the end of two years, what ready Money will satisfy the said debt? first find the interest of any sum for 2 years at 6 per Cent. so the interest of 100 l. for 2 years is 12 l. wherefore,

As 112 l. 100 l. :: 400 l. 357 l. 142857. The Decimal Fraction (.142857) is found by the Decimal Table for Money to be 2 s. 10 d. $\frac{1}{4}$. or being reduc'd as is formerly taught, is 2 s. 10 d. 285. so that if 400 l. be due at the end of 2 years to come, 357 l. 2 s. 10 d. 285. in ready Money will satisfy the debt, which agrees exactly with Mr. Clavels Tables of Rebate, in this example. I hope by what hath been formerly shewed, the Reader doth well understand by the points and the order of the Rule, that 112. is the Divisor, 100 Multiplied by 400. is the Dividend, and 357 l. 142857. the quotient.

The Construction of the Tables of Forbearance, Discompt, and Purchase of Annuities at 6 per Cent. compound Interest, or for any other Rate of Interest.

1. **T**HE Table for Forbearance of Annuities is thus made; Multiply an Unite with Ciphers by 100. and the Rate together, so to make the Table for the Forbearance of Annuities at 6 per Cent. Multiply an Unite with Ciphers by 106. and add an Unite in the first place; so 1.000000. being multiplied by 106 the product is 1.060000. unto which add an Unite in the first place, and it will be 2.060000. which is the number for the Forbearance of Annuities for 2 years. Again, Multiply 2.060000. by 106. and the product is 2.183600. unto which add an Unite in the first place, and it makes 3.183600. which is the number for 3 years: After this manner may the Table be made for as many years as you please.

2. The Table for Discompt of Annuities for years is thus made; first prepare a Table for Discompt of Money, compound interest for years, which is thus made.

As 100. and the Rate added together to 100.

So an Unite with Ciphers, to the number for the first year.

So if the Rate be 6 per Cent. divide an Unite with a sufficient number of Ciphers, by 106. the quotient is the number for Discompt of Money for one year; so if you divide 100000000000.0000000. by 106. working it out to a large number of places, the quotient will be .943396226. &c. which quotient is the number for one year; again, divide that quotient, viz. 943396226. &c. by 106. the quotient is 889996440. which is the number for 2 years, which being divided by 106. the quotient is the number for 3 years; and so after this manner the Table for Discompt of Money, compound Interest, may be made for as many years as you please. By the Table of Discompt of Money compound Interest, may the numbers for Discompt of Annuities be made thus. The number for the Discompt of Annuities for one year, is the same

same with the number for Discompt of Money for one year; the sum of the numbers for Discompt of Money for 1 year and 2 years, is the number for Discompt of Annuities for 2 years, unto which add the number for Discompt of Money for 3 years, the sum is the number for Discompt of Annuities for 3 years: and so may the Table be continued for as many years as you please.

3. The numbers for Purchase of Annuities are made by dividing an Unite with Ciphers by each of the numbers for Discompt of Annuities; the quotients will give the respective numbers, for the respective years for the Purchase of Annuities, (wherein the Reader is to take notice, that the numbers for Discompt of Annuities, which are to be the Divisors, are to be calculated to more places then are there exprest, as is formerly noted) so if you divide 1 with Ciphers by 7360086. the number for discompt of Annuities for 10 years, the quotient will be 13586797. which is the number for Purchase of Annuities for 10 years, of which the 6 first figures may be sufficient, making the last figure (7) to be 8. because 9 follows, viz. 135868. and thus is the Table of Purchase of Annuities made; the several Tables with their uses follow.

The use of the Tables for Forbearance, Discompt, and Purchase of Annuitis.

Multiply the number in the Table, answering to the number of years by the Annuity given, and from the product cut off 6 places to the right hand; the figure or figures to the left hand are the number of pounds, and the value of the Decimal Fraction remaining to the right hand, may be found either by the Decimal Table for Money, or by reducing it as is formerly taught.

Example 1.

There is an Annuity of 100 *l. per Annum* in arrear for 12 years, it is demanded what it doth amount unto at the rate of 6. per Cent. compound Interest; look in the Table for Forbearance of Annuities, and the number answering to 12 years, is 16869940. which Multiplied by 100. the product is 1686994000. from which cut off 6 places to the right hand thus, 1686 | 994000. which is 1686 *l.* and the value of the Decimal Fraction, viz. .994000. by the Decimal Table for Money aforegoing is found to be 19 *s.* 10 *d.* $\frac{1}{2}$. and somewhat more, which agrees within a Farthing with Mr. Clavels Tables.

Example 2.

There is an Annuity of 100 *l. per Annum* to continue 12 years, what is it worth in ready Money? Look in the Table for Discompt of Annuities for 12 Years, and the number answering thereunto is 8383843. which being Multiplied by 100. (the Annuity given) the product is 838384300. from which cut off 6 places to the right thus, 838 | 384300. so are 838. the pounds, and the value of the Decimal, viz. 384300. is found by the Decimal Table for Money to be 7 *s.* 8 *d.* $\frac{1}{2}$. very near, which also agrees with Mr. Clavels Tables within less than a Farthing.

Example 3.

Example 31

What Annuity to continue 9 Years will 1000 *l.* buy? seek in the Table for Purchase of Annuities for the number answering to 9 Years, which is 147022. which Multiplied by 1000 *l.* the product is 1471022000. from which cutting off 6 places to the right hand, the figures to the left hand are 147 *l.* and the value of the Decimal Fraction .022000. is found (as before is shewed) to be 5 *d.* $\frac{1}{2}$. *ferè*, agreeing likewise with Mr. *Clavels* Tables.

There are other ways of Calculating these numbers in the Table aforegoing, but this I thought sufficient for the end I designed it, which was to shew the Reader a way to examine Mr. *Clavels* Tables, and how others may be made at any other Rate of Interest.

In Page the 6th of the Appendix, Line the 17th instead of Multiplied by 300. Read Multiplied first by 6. and that Product by 300.
